### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

1. Regarding claim 1, claim is allowable over prior art of record because the cited references (US Patent 5,805,639) either singularly or in combination cannot teach or suggest "updating the filter coefficients in response to an error signal derived from an output signal from the equalizer and adjusting an output signal level of the filter processing unit as set forth in the application claim".

2. Regarding claim 9, claim is allowable over prior art of record because the cited references (US Patent 5,805,639) either singularly or in combination cannot teach or suggest a level-adjustment unit as set forth in the application claim

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tonch et al. U.S. Patent 5,805,639 discloses "Adaptive Network".

Larsson U.S. Patent 5,204,878 discloses "Method And Effecting Channel Estimation For A Fading Channel When Transmitting Symbol Sequences".

Tokunaga et al. U.S. Patent 6,907,064 discloses "Waveform Equalization Controller And Waveform Equalization Control Method".
